OVERVIEW: VENUES PER REGION (PER LIVE DMA MEMBER) 27
Live DMA is a strong network of music venues associations across Europe and represents 2597 live music venues and clubs as part of 19 members in 15 countries.

Since 2012, Live DMA collects data to highlight the huge artistic, social and economic impact of live music venues and clubs in Europe. The data results are used for representation on a local, national and European level, as it can help individual music venues or representative associations to increase awareness, recognition and adapted support for live music.

From 2017 to 2021, Live DMA receives funding from the Creative Europe programme of the European Commission for the Live Style Europe project. One of the key actions of Live Style Europe is to develop The Survey, to increase the representativity of the music venues and promote the exchange of knowledge between music venues and their networks. Live DMA is recognised as a relevant interlocutor by European institutions. We advocate towards European policy makers to improve the live music conditions in Europe and the sustainability of the local music scenes. Live DMA strongly supports and actively contributes to the emergence of a future European programme dedicated to the music sector, ‘Music Moves Europe’, and the development of a European Music Observatory.

In this perspective, we hope this new report can help policy makers to better understand the reality of live music venues and clubs in Europe, convince them about the importance of public support, and include our recommendations in their future music policies.

The Survey report presents key numbers of music venues and clubs across Europe to better comprehend the role, capacities and values live music venues and clubs have, by looking at their main characteristics, functions, activities, audiences, human resources and financial numbers. Here we also provide a more accurate reading of different types of music venues, based on their legal status and audience capacity. In this new publication, we look deeper into the differences between types of venues and clubs with a public, private non-profit or private commercial legal status. We also give an overview of the main characteristics of the venues and clubs per geographical region and per Live DMA member. In this way, we get better insights in the large diversity and different business models of music venues, and we are able to compare the same types of venues across Europe with each other. This is followed by recommendations on the use of the data results in the last part of this report.

INTRODUCTION

« If it were not for all these spaces, I would not have been able to find myself as a musician, as a performer, as an artist. Long live these little temples of live music, we must protect them because, without them, music lovers are lost. » Rosalía

« I’ve had the luck to be invited to play in different venues, big and small throughout my career. I would never have been the artist that I’m now without the support of the grassroots venues. Smaller clubs were the perfect preparation for the bigger festivals. Both the intimacy between public and artist and the creative process on stage only reach their full potential in grassroots venues. That’s why they’re still my favourite place to perform. » Selah Sue

Extracts from “What Artists Say” campaign, June 2019.

#SupportYourLocalMusicScene
Live DMA’s music venues and clubs present nearly a million artist performances per year. Live music venues and clubs are precious platforms for artists to be discovered and build their fanbase, especially for emerging talents. In the last decades, performing live has also become more important to most musicians, comparing to the income they generate from recorded music or the visibility they gain from the streaming platforms.

Live music venues and clubs create a large scale of jobs and skills, such as management, administration, production, communication, programming, education, technics, public relations, mediation, and other kinds of services. People involved in music venues and clubs get the opportunity to develop multi-skilled careers’ paths as many of them often combine different tasks. The experience and skills gained by the volunteers can also be highlighted in their professional career.

The music venues expenditure is quite similar for different types of venues (smaller and larger, non-profit and commercial), with roughly the same share of costs for programme, workers and accommodation. The income models are much more different, related to the type of venue (audience capacity, legal status), which is explained in more details in the next chapters.

Music venues and clubs not only provide over one billion euro income which creates a high employment rate for the workers and performing artists, but they also participate to the vibrancy of cities and rural areas. The Music Cities Manual, published by Sound Diplomacy, explains how “music creates jobs, is a regeneration tool, increases economic output, is a tourism driver, improves wellness, enhances social inclusion, supports global Sustainable Development Goals, supports thriving nighttime economy”.

Live music venues and clubs also create many economical spillover effects, which are not detailed in this report, but that you can find in other studies published by our members, such as the UK Live Music Census and the Berlin Club Study, which states: “The turnover-related overall effect is around 1.3 times the direct turnover of the Berlin club scene. Between 20 and 25% of the overall economic output goes back to the local or national governments through taxes.”
LEGAL STATUS:
A DIVERSITY OF BUSINESS MODELS

8% of Live DMA venues are public organisations, 44% are private non-profit, and 48% are private commercial. The live music sector relies on a complex ecosystem and this diversity translates into different business models, and different types of regulations the venues need to comply with. This leads music venues and clubs to different needs and priorities, and it might be challenging to create music policies that answer them all. This Survey provides a better understanding of the European live music landscape. Still, the different types of venues have so many practices in common that many political actions can be implemented to benefit all of them. The Survey aims to be a first step in identifying different levels of well-adapted actions for policy-makers to embrace and support the rich diversity of the European live music sector. Despite their different legal status, the music venues and clubs all work with the same objectives: programming a diversity of artists, welcoming diverse audiences, developing a project linked to their territory and being recognised as cultural actors.

The live music associations part of Live DMA are federated around the value of general interest; all need to read, sign, agree and comply with an ethic charter clarifying these values. You can access this ethics charter on the dedicated webpage: http://www.live-dma.eu/wp-content/uploads/2019/06/LiveDMA_Ethical_Charter_2019.pdf

AUDIENCE CAPACITY:
A SPACE FOR EVERYONE

---

The Survey results show that 51% are small venues (<400-audience capacity), 36% are medium-sized venues (400 to 999 capacity) and only 13% are large venues (1000+ audience capacity). The larger venues often consist of multiple smaller concert halls. The median capacity of all live music venues is 375 audience capacity. In that sense, Live DMA’s live music venues and clubs are mainly but also generally small music venues, especially when compared to arenas composed of one main hall.

Public venues in average have larger concert halls for live music (600 median), compared to private non-profit venues (399 median) and private commercial venues (300 median). The latter is mainly caused by the relatively small audience capacity of venues in Germany, Spain, Sweden and the UK.
The music venues and clubs all share their core activities of organising live concerts and programming music, but only 37% of them present live music as their only function. One third of all venues manage social and educational activities, rehearsal spaces, support and projects for artists. One third of all venues combine live music with running a bar or restaurant outside concert hours. In addition, almost half of all respondents have multidisciplinary functions such as hosting a cinema, theatre, photo gallery or organising other non-musical activities.

The Survey results show us that the smaller the venue, the more chances the venue has live music as its only function, while larger venues have a higher share of social, educational and artists’ support projects.

**Functions: More than Live Music**

Venues’ Functions Per Audience Capacity

- **Live Music as Only Function?**
  - **Small:** 35%
  - **Medium:** 26%
  - **Large:** 19%

  - **Social & Education**
  - **Tools & Space for Musicians**
  - **Support for Artists’ Projects**
  - **Bar / Restaurant**
  - **Multimedia & Audiovisual Art**
  - **Cinema & Film**
  - **Theatre / Dance**
  - **Exhibition / Photo Gallery**
  - **Other Activities**
Public venues, especially, have almost never (2%) solely a live music function. Public venues more often have social & educational functions, next to presenting live music: 80% of public venues have a social/educational function compared to 45% of private non-profit venues and 31% of private commercial venues.

Public and private non-profit venues more often have tools, spaces and/or support for artists’ (projects): 82%/63% of public venues, 42% of private non-profit venues and 21%/13% of private commercial venues.

Regarding the bar-restaurant function of the music venues outside concert and clubhours, this is often part of their business model to cover the costs of the music programming. Many of the music venues within the Live DMA network are also multidisciplinary centres where artists and audiences from different art forms and subcultures are connected.
In average, a music venue or a club organises 157 music events per year and programmes 367 artist performances during these events. This means the venues and clubs present an average of 2.3 artist performances per music event. These additional live performances are mostly support acts of the headliner artists and/or a line-up of multiple artists.

The programming of support acts and multiacts are an important way for venues to present more new upcoming talents. It is often the first stage experience for local artists, and crucial for the talent development of emerging artists.

38% of all music venues also organise festivals, especially larger venues.

It is a common assumption to think that the online streaming format impacts live music practices in the way that people do not want to spend 60-90 minutes to listen to one single artist’s show. However, the Survey results show that the audience is not turning away from these traditional formats as the number of regular concerts and visits in the music venues and clubs is still very high. Moreover, music venues also adapt to new trends and audiences behaviour by organising more multiacts and conceptual events and club nights. New formats attached to live music create other complementary experiences but do not seem to replace the concerts experiences in the live music venues and clubs.

83% of all visits were with an admission fee, and 17% of all visits were free entrances.

When looking at different types of venues here we notice that smaller venues more often programme free concerts. These are mostly venues that combine the function of live music with a bar/restaurant.

Public venues have on average more free visits to music events (23% free visits), compared to private non-profit venues (20% free visits) and private commercial venues (16% free visits).
Access to free events creates positive cultural habits, especially for young audiences. It is also a way to open venues to a broader audience, who will take less ‘financial risks’ to attend a concert different from their usual music tastes. Therefore, subsidies can help to organise free events and bring opportunities to present more emerging talents to new audiences.

Unfortunately, Live DMA also observed flipside effects to this phenomenon. For instance, private commercial venues sometimes experience free events organised by public organisations as an unfair competition to their own music events, especially when not combined with adapted music policies. These free music events, often organised by municipalities, programme big acts for free mostly during summer. This may be a direct consequence of the growing competition between cities at national or European level to become more and more attractive. It can create audiences that are less willing or used to pay for concerts and for live music in general. The only solution for this is a better dialogue and cooperation between public and private actors to implement music policies at local level, such as subsidies for programming emerging artists, legalisation of access to music venues for people under 18, co-organisation of major events with the existing music venues and implementation of long-term policies to protect venues and music areas.

Music venues and clubs play an important role in the cultural life of rural areas and of cities. They constitute spaces to develop a sense of citizenship, as well as meeting places for artistic expressions and cultural diversity. With their large spectrum of activities, we understand that the users of the music venues cannot be defined in two separate groups: the creators on one side, and the consumers on the other side. They can be active participants in social or educational activities (ex: youth concerts or choirs). They can rehearse with their own band in the venues’ studios. Artists might also participate and benefit from activities coordinated by the music venues such as residencies and other ways of artistic support. Moreover, the format of concerts and the listening practices are evolving (location, scenery, interactions…) and these frontiers around the stage tend to be more permeable.

“Erika Fischer-Lichte describes theater as a performance that everybody present in the room participates in. Without the audience, the experience cannot take place. The audience thus becomes a creator in the art of theater. The same thing can be said of the club experience: it cannot be created without the club-goers themselves” 3

Moreover, the role of live music venues and clubs for individual and collective emancipation must not be underestimated. For the 70 million visitors per year, the music venues and clubs are spaces of social gathering. They can be havens of discovery, free expression and performances where conventions and identities can be deconstructed for a period of time. Venues and clubs put efforts in being a safer place for minority groups, marginalized people and different subcultures.

The Diversity Roadmap4, a tool created by the Swiss live music association PETZI in collaboration with other Swiss feminist and music organisations, is an example of this reflection that takes place within live music venues and clubs to include all experiences and realities in their programming as well as in their teams.

As the academic Jodie Taylor explains: “It was only as a musician and music lover that I was allowed to be fluid: to interpret and reinterpret, to create and recreate. Music allowed me to perform gender and express sexuality in multiple ways that were unavailable to me in daily life […] Several years later, I started going to queer bars and clubs. These spaces were meaningful, not least because they allowed me to meet and socialise with like-minded people, but that socialising was almost always accompanied by music and dancing”. 5

4 http://www.live-dma.eu/the-diversity-roadmap/
In total, 93,000 people are actively involved in one of the 2,597 music venues that are part of Live DMA, excluding the artists and the audiences. The venues human resources consist of well over 87,000 workers that is equivalent to well over 17,000 fulltime equivalent (FTE). The music venues are mostly run by professional paid staffs, but the amount of tasks done by volunteers is essential in most regions, specifically for private non-profit venues and mostly for smaller venues. Also interns and trainees add an important contribution.

In total, well over 27,500 paid professionals (11,000 FTE), and over 56,000 volunteers (5,000 FTE), work at the venues. Additionally there are almost 3,500 other workers (1,350 FTE) active, such as interns and trainees and 8,690 volunteers in France, which cannot be defined as workers under the French law.

Because volunteers in average work less hours per week than paid staff in the Survey results we see that volunteers are the highest share of all workers expressed in persons, but paid employees are the highest share of all workers expressed in working hours (full time equivalent). Almost two third (63%) of all the work in music venues and clubs is paid work.

There is a high diversity of volunteer engagement in music venues in Europe, which is related to different legal status of music venues, different audience capacities and different volunteers culture and legislation from one country to another.

Division of Paid and Volunteers Work(ers) - All venues

<table>

<tr>
<td>• FTE OTHER (TRAINEES) OF TOTAL WORK</td>
<td>9%</td>
</tr>
</tbody>
</table>
Volunteer work is very important especially for smaller music venues where volunteers do 37% of all the work (FTE), comparing to 26% in medium-sized venues and 19% in larger venues.

The amount and method of volunteers’ engagement also differs per region depending on the laws and regulations. In France, because of a different legislation, volunteers cannot receive any compensation and cannot take a task or a job that can be done by an employee. Therefore they are not counted as workers and expressed in FTE in our Survey results, but they are included in the total human resources, because they do give an important contribution to the French music venues.

In most European countries, especially for venues with a private non-profit legal status, volunteers are integrated in the venues’ culture and business models as valuable workers.

Although volunteers’ work is generally understood as time and effort that is freely given, in most countries volunteers can get a small financial compensation and are rewarded with benefits like discounts or free concert visits, access to catering, and other group activities. Also, they often carry out essential tasks during concert hours such as handling the bar, wardrobe, and helping out with the lights and sound. Although the concrete impact of volunteering on people’s lives is intangible, notably due to the diversity of profiles and tasks volunteers undertake, we can count among the benefits of volunteering: social experience and emancipation, professional networking, skill development and active participation in society.

Over 200 of Live DMA live music venues and clubs (7.8% of total) are exclusively run by volunteers. Many music initiatives are based on the free commitment of music organisers, and many professionals started their career as volunteers. Policy makers should take them into account with a specific support and avoid to create administrative burdens for volunteerly-run organisations.
More than half of Live DMA’s music venues are micro-organisations working with 5 or less than 5 FTE paid work. Regulations asking for too strict measures to comply with may harm the competitiveness of such organisations. Employment subsidies can therefore be very helpful for music venues and clubs.

The Survey includes a new question about the balance of female/male workers in the music venues and clubs. These first results are based on available data from Belgium, Denmark, Finland, France, The Netherlands, Spain and Sweden.

Two studies from our members in France (FEDELIMA) and The Netherlands (VNPF) give more insights about the repartition of female/male workers in their music venues:

These studies show similar results: most of the jobs occupations are highly gendered. The family of trades has an impact on the gross wages of employees. In this sense, the management and programming trades are those with the highest remunerations, and these are the positions most occupied by men.

Live DMA members develop several programmes and initiatives to empower gender minorities within the live music sector. Find more information about these initiatives on our website.
In total the 2,597 music venues represented by Live DMA overview 1.8 billion euro turnover per year. The average expenditure of music venues across Europe is 32% spend on direct programme costs, 34% on workers/personnel costs, and 13% on housing costs.

Share of Expenditure - All Venues

The Survey results show us that, on the one hand, the expenditure is very much alike for all types of venues, despite their audience capacity, region and legal status. On the other hand the income of the venues is very different, depending mostly on their legal status and audience capacity.

Share of Expenditure Per Audience Capacity

Share of Expenditure Per Legal Status
The average income of music venues across Europe consists of 35% from ticket sales, 37% from food & beverages, and 16% from subsidies. It is important here to point out this is an average of a diverse mix of venues with different legal status and audience capacity, so it is not very representative for individual music venues.

The income model depends on the venues audience capacity:

- For small venues, in average 52% of their income comes from audience spendings (23% ticket sales + 29% catering sales)
- For medium venues, in average 58% of their income comes from audience spendings (27% ticket sales + 31% catering sales)
- For large venues, in average 62% of their income comes from audience spendings (37% ticket sales + 25% catering sales)

Large venues generate more income from ticket sales and food and beverage. Smaller venues cannot generate as much income from audience, because they have less audience capacity, and organise more often free events.

Share of Income Venues Per Legal Status

- For public venues, 54% of their income comes from ticket sales, 31% from food & beverages, 25% from subsidies, and 11% from other income.
- For private non-profit venues, 50% of their income comes from ticket sales, 31% from food & beverages, 25% from subsidies, and 2% from other income.
- For private commercial venues, 50% of their income comes from ticket sales, 31% from food & beverages, 25% from subsidies, and 2% from other income.
The income of venues with different legal status is very different:

- For private commercial venues 88% of their income comes from audience spendings (38% ticket sales + 50% catering sales)
- For private non-profit venues 55% of their income comes from audience spendings (30% ticket sales + 25% catering sales)

When we compare the direct programme costs to the income of ticket sales we can see that, in average, the ticket sales cover all the income for the artists (105%), but for many smaller venues the ticket sales do not cover the programme costs. In average, large venues ticket sales cover 116% of the direct programme costs. For medium venues this is 102%, but for small venues only 82% of the programme costs is covered by ticket sales.

Since 52% of the venues are non-profit, they do not aim to make any benefit. The other 48% have a commercial status and are allowed to make profit, but as the numbers show, the profit generated is very low or barely existent and most income is invested back in the function of the music venue. The income from ticket sales is used to cover the programme costs and turnover from food and beverage sales. Subsidies are often essential to cover necessary expenses such as employment and accommodation costs.

Non-profit organisations often get financial support from local or national governments as a recognition for their general interest mission and for supporting their work in programming diverse music genres and artists that are still at the beginning of their careers. Those subsidies can cover housing costs, employees costs, music programme and other activities like community work and educational activities.

In general, the live music venues and clubs’ financial situation is fragile as they are very dependent on subsidies, volunteers’ work, audience’s spendings (catering) and rules and regulations to survive, which of course represents precarious situations for the staff and the emerging talents.

In many cities across Europe external factors tend to further weaken this fragile situation. Gentrification and the concentration of activities in urban areas impact the live music scenes: housing costs increase, noise regulations and the regulation on opening hours become more strict, noise complaints become more common as more people live near a live music scene.

Want to know more? Check our online resource here [http://www.live-dma.eu/prevent-conflicts-between-live-music-places-and-local-authorities-or-neighbours-the-club-kataster-project/]
The Survey results teach us that the differences between music venues in the different European regions are mostly related to their legal status (public/non-profit/commercial), audience capacity (small/medium/large) and regulations and level of support by governments. By looking at the type of venues per legal status and in different régions, we notice that:

- In Belgium, Spain, Sweden and UK the Live DMA members do not represent any public venues, while other countries (France, Denmark, Norway, Finland) have 20% or more public venues.

- In Belgium, Switzerland, France and Netherlands the Live DMA members do not represent any private commercial venues, while other countries (UK, Germany, Finland) have more than 50% commercial venues, up to 90% in Spain.

- In many regions the most important type of venue the Live DMA members represent is the private non-profit venue, with a share of 70% and more in Sweden, Denmark, France, Switzerland, Belgium and the Netherlands.

Please note that the Survey only takes into account the members of the live music associations Live DMA gathers. For instance, in France and Switzerland, FEDELIMA and PETZI do not accept private commercial venues or clubs as their members, although such organisations can be found in the territories they cover.

Taking into account the different legal status and diversity of audience capacity in different regions, we have attached a more detailed overview of the Survey data results per Live DMA member, including some totals and averages and main characteristics of the venues in these regions or countries, which can be used for representation and to compare venues across Europe. See Attachment 4.
Live DMA is a European non-governmental network working to support and promote the conditions of the live music sector. Live DMA is by nature an international collaboration network based on shared visions and values. The network is composed of 19 members situated in 15 countries. The members are regional and national live music associations that represent more than 3000 music venues, clubs and festivals located all over Europe.

In 2017, the European Commission recognized Live DMA as European network and granted, via the Creative Europe programme, a funding to develop the network’s project Live Style Europe. Live Style Europe is a “building capacity programme” with the objective to empower live music associations and to provide them with skills and tools in order to adapt to the changes of the music sector.

By gathering independent players from the entire live music sector, Live DMA acts as a collective voice in order to work on European challenges and highlight the substantial cultural and social work of live music professionals.

As member of the European Music Council, and the International Music Council Live DMA is also actively engaging with other European cultural networks in order to make changes in the European approach to culture with the aim to include culture and the arts in the long-term goals of the European project.

The International Music Council has proclaimed and works towards the advancement of Five Music Rights. As a member of the European Music Council, Live DMA commits to these Five Music Rights.

«The International Music Council advocates access to music for all. It has proclaimed and works towards the advancement of the Five Music Rights.»

Co-funded by the Creative Europe Programme of the European Union
The context related to live music venues and clubs is strongly connected to the implementation of adapted policies, funding and regulation; from local, to national and European level. An effective environment for the live music scenes relies on the good balance between these double triangle relationships.

The recommendations in attachment 1 aim to include the key facts of the live music venues and clubs detailed in this report, in order to develop favourable conditions for the development and sustainability of our sector.

These recommendations are extracted from previous campaigns and consultations in which Live DMA was involved, such as the Music Moves Europe structured dialogue, the European elections campaign, and the “Music is not Noise” working group. Some recommendations are also extracted from the European Agenda for Music, a tool that aims to converge the European music sector’s many voices in order to establish an ongoing dialogue between policy makers and the music sector.

These general recommendations can be developed and adapted taking into account local and national specificities. A series of role models and best practice studies are also available on the Live DMA resource platform. For more insights and details, do not hesitate to contact Live DMA’s coordination team and our different members at national level (contacts at the end of the report).
In this study, Live DMA represents 2597 music venues and clubs in 15 different countries. This study shows the results of the latest survey about the year 2017, that was carried out from September 2018 until May 2019, with addition of data 2016 of LiveKomm and PETZI venues, to complete the 2017 data. Live DMA’s members have sent the same 25 questions to 1943 music venues and clubs of 14 different networks in 11 countries: Belgium, Denmark, Finland, France, Germany, Netherlands, Norway, Sweden, Switzerland, Spain and UK. Data of 604 venues were collected (31% response), which are in this study extrapolated to totals per Live DMA member and to all 2597 music venues within the Live DMA network.

Since 2012, Live DMA collects data to represent the venues and clubs on a European level and compare them on different scales. The Survey measures:

• **ORGANISATION**: legal status, audience capacity
• **ACTIVITIES**: functions, music events, music performances and audience visits
• **HUMAN RESOURCES**: paid staff, volunteers and other workers (interns and trainees) in persons and calculated in working hours to fulltime equivalent (FTE)
• **FINANCE**: programme costs, employment costs, housing costs, ticket sales, subsidies, food & beverages sales, total income, total expenditure and financial result.

Questions and definitions are synchronized for all participating Live DMA members to create useable totals and average numbers.

For a list of definitions of the Survey questions and main terminology, see attachment 2.

The Survey is repeated every year to keep track of the most actual numbers and situation of the venues, but also with the aim to discover trends and developments. Every year more countries and venues participate in the Survey.

Attachment 1: Recommendations

RECOMMENDATIONS RELATED TO DATA COLLECTION

“Create an independent body such as a Music Observatory as a European base for data, and research on the music sector and market.”

“Increase, standardise and compare data collection at European level so as to guarantee consistency and reliability in the data collected.”

Extracted from the European Agenda for Music

RECOMMENDATIONS RELATED TO ACCESS TO FUNDING

• Support Creative Europe as the dedicated programme for the cultural and creative sectors in Europe, with an effective budget, in order to implement its different actions and enable a relevant impact on the sector. We support the European Parliament’s proposal to double the budget for the Creative Europe programme.

• Develop The Survey methodology and support the initiative towards other music sub-sectors (shared indicators, capacity building, development & structuration of the music sector)

• Develop qualitative research and partnership with the research sector (through dedicated programme and funding such as Horizon 2020)

• Develop flash studies about music and practices and audience patterns in an inclusive way (not only as consumers)

• Develop flash studies/market analysis about artistic diversity and circulation within live music in Europe

• Develop flash studies about employment, skills and competences, including the volunteers

• Select more projects per call. Small organisations also have reduced teams, and they do not invest time for an application if the success rate is very low.

• Give a high percentage of European co-financing per project (at least 80%).

• Guarantee a pre-financing to avoid cashflow issues.
RECOMMENDATIONS RELATED TO DIALOGUE & MUSIC POLICIES

“Further explore the social, societal and economic impact of music at municipal, regional and national levels and encourage governments to invest in music.”

- Develop music policies that highlight the public interest rather than the economic potential of the sector
- Support the diversity (in terms of art, culture but also organisations) of the music sector, endan-gered by the development of global companies.
- Support dialogue and cooperation between the public and private organisations rather than competition, to strengthen the impact of the music policies.
- Make music (venues and clubs) part of the city plan. In order to do so, we recommend bringing decision makers, cultural players, and citizens together for consultations and exchange on smart policies regarding music and city planning. Support the creation of a forum that offers the possibility to exchange knowledge between policy makers and the music sector. Such a forum can take form of a night embassy, night council, local network, or any other organ that represents the local music sector and is recognised by it. In many bigger European cities, these organs have been existing and ope-rating for several years. Examples can be local networks (Berlin Clubcommission or Zurich Bar and Clubcommission), multi-partner projects (Plateforme de la Vie Nocturne), dialogue plans (French SOLIMA), or the presence of a Night Mayor (example: London Amsterdam, Mannheim, Groningen).
- The instauration of informal meetings/yearly reception where policy makers visit the local live music venues and clubs. On occasions such as the Open Club Day, venues and professionals get the chance to demystify potential negative stereotypes related to their place and show what can be done inside a live music place. Together with the sector, city officials, politicians, and policy makers can raise the ambition of these local live music places for their cities/communities

“Promote a sense of ownership among citizens by encouraging them to participate in music projects artistically, financially or as volunteers.” Extracted from the European Agenda for Music

RECOMMANDATIONS RELATED TO FUNDING & REGULATIONS

“Recognise that music venues contribute to culture and allow them to access funding and/or beneficial tax regimes.” Extracted from the European Agenda for Music

- The implementation of the Agent of Change into law in order to protect and preserve the cultural values of venues and clubs and the economic, cultural and social tissue of cities and communities. The example of the implementation process in the UK can be viewed in the webinar produced by Live DMA. The Agent of Change is a positive approach that makes policy makers, the sector, and urban planners work together.
- The creation of a sound proofing/infrastructure fund by making available public funds for soundproofing allows to protect the ecosystem of neighbourhoods. Such a fund creates a positive story of investing in the vibrancy and livelihood of neighbourhoods. Existing examples of such funds are the Lärmschutzfonds Berlin and the Barcelona City Council Subsidies for sound investments for live music venues.
- The recognition of live music venues as cultural spaces should have regulatory effects at local level on lowering VAT and housing costs, which would prevent from the fragility of many music venues and clubs. Opening hours, restricting age access must also be discussed with the local representatives of music venues and clubs to find a common agreement.

You can find out more about Live DMA’s advocacy work and our recommendations:
- Music is not Noise, results of Live DMA’s Working Group and recommendations towards the World Health Organisation
- The European elections campaign and letter to the Members of the European Parliament
- Co-statements to the European Institutions about the future of Creative Europe and Music Moves Europe
- European Agenda for Music, coordinated by the European Music Council.
**Audience capacity** of the music venues includes only the spaces used for music events, such as concert halls. It’s the capacity of all concert halls added up that can be used simultaneously, on account of which the whole accommodation can be seen as sold out. It does concern the financial number, not the engineering capacity or the number of attendants authorized by the fire department.

**Social & Education activities** of music venues and clubs are for example cultural actions, community work, music courses, partnership with schools, etc.

**Tools & space for musicians** of music venues are for example rehearsal studios, recording studios, resource centres, etc.

**Support for artists’ projects** of music venues are for example artist residency programmes, administrative and technical trainings, etc.

**Bar/restaurant function** is applicable if the music venue also functions as bar/restaurant outside concert hours.

**Music event** is a public event that is promoted as one programme with a separate admission fee or free admission. Music events can include multiple music performances of acts/bands/DJ’s.

**Paid visits** concerns the attendants that pay any form of admission fee.

**Free visits** concerns the attendants that pay no form of admission fee, because the music event has no admission fee, or they are invited as guests to music events with an admission fee.

**Human resources** include all the venues and clubs’ workers (paid employees, volunteers and other workers) as well as the volunteers of Fedelima venues in France that cannot legally be defined as workers.

**Paid employees** include the venues own payroll, hired staff, subsidized employees and freelancers. It excludes volunteers and other workers with or without financial compensations, like interns. It also excludes the performing artists and artists own crew.

**Volunteers** are people who perform a service for the venue voluntarily and in their free time. Volunteers do not receive any salary, at the most (financial) compensations allowed for volunteers. It excludes other workers with or without financial compensations, like interns. It also excludes the performing artists and artists’ own crew.

**Other workers** are for example interns, trainees, defrayed, civic services, etc. working for music venues. It excludes workers on own payroll, hired staff, subsidized employees and freelancers. It also excludes volunteers. It also excludes the performing artists and artists own crew.

**FTE** stands for Full Time Equivalent. The workweek can differ per organisation, and thus also the value of a FTE. For example for an organisation that uses a standard work week of 40 hours, a staff member with a workweek of 40 hours equals 1,0 FTE (40/40=1,0). A staff member with a work week of 32 hours equals 0,8 FTE (32/40=0,8).

**Total income** is the sum of the venues ticket sales, food & beverage, subsidies and all other income.

**Ticket sales** are all income of revenues. It excludes other and indirect programme related revenues such as wardrobe, cloakroom, reservations, memberships and merchandising.

**Subsidies** is all income from public funds, municipality, region, state, European Union, etc.

**Food and beverage** is all income from the sales of food, drinks, beverages, catering, etc.

**Total expenditure** are the sum of programme costs, housing costs, employees costs, food & beverage purchase and all other costs.

**Direct programme costs** are all costs directly related to the artist performances, such as wages, bailouts, partage payments, author/copyright fees, booking fees, artists catering, extra backline or extra decor. Advertising costs are not included. In house sound systems, décor, backline, hall rentals, etc are not included.

**Workers/Personnel costs** are all costs for employees, freelancers, volunteers and others working to make the music activities possible, in preparation and during the event. It includes gross salaries, plus employees’ social insurance and volunteers costs. Gross salary includes payment in the form of additional rewards like allowances, bonuses, overtime, reimbursements living/traffic, contributions (premium) savings and benefits, etc. The social charges include the employer’s share of social security contributions, pension costs, contributions to health insurance, compensation for relocation, housing, child care, work clothes, etc. Volunteers costs can include costs for activities, travel, accommodation, education and training, insurance, meals, etc. It does not include artists fees and compensations.

**Housing costs** are all costs for renting the building, insurance, energy, water, cleaning, remote monitoring large and small maintenance (such as service contracts, installations).

All financial numbers in this Survey are in EURO and excluded VAT.
8% of all Live DMA venues are public music venues, but are only common in the venues’ associations in Denmark, Finland, France, Germany and Norway, and a few venues in the French part of Basque Country, the Netherlands and Switzerland. The public non-profit venues in the Live DMA network have a median of 600 audience capacity, so are relatively large comparing to other Live DMA venues. The average public venue programmes 98 music events per year, with 165 artist performances, which attract well over 25,000 people per year. 33% of the public music venues also organise festivals.

The venues do much more than live music alone, and especially the public venues have a relatively high share of social and educational activities, tools and spaces for musicians and support for artists projects.

VENUES FUNCTIONS PER LEGAL STATUS

- Live Music Only Function? 2%
- Social & Education 80%
- Tools & Space for Musicians 82%
- Support for Artists’ Projects 63%
- Bar / Restaurant 31%
- Exhibition / Photo Gallery 43%
- Cinema & Film 16%
- Multimedia & Audiovisual Art 20%
- Theatre / Dance 31%
- Other Non-Musical Activities 35%

Public music venues are to some extend initiated and paid by the public authorities, and therefore subsidy is a high share (54%) of the total income of the public venues in average. The venues generate also some income from the audience (36%) by ticket and catering sales. Although the income is very different, for public venues the share of expenditure spend on the music programme, workers and accommodation is not much different from private commercial and private non-profit venues.

There is a high amount of volunteers (33%) helping in public venues, but volunteers’ work is a very low (4%) share of the actual working hours. Most work (87%) is done by paid professionals. In total 39% of the workers in public venues are female.
Attachment 3B: Overview PRIVATE NON-PROFIT Venues

44% of all Live DMA venues are private non-profit music venues. They are the most common legal status of venues in the venue associations in Belgium, Denmark, France, Netherlands, Sweden and Switzerland, and are also present in the networks in the UK, Finland, Germany, Norway, Basque Country and the rest of Spain.

The private non-profit venues in the Live DMA network have a median of 399 audience capacity. The average private non-profit venue programs 99 music events per year, with 218 artist performances, which attract well over 24,000 people per year. 47% of the private non-profit music venues also organise festivals.

The venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as the ones listed below.

VENUES FUNCTIONS PER LEGAL STATUS

- LIVE MUSIC ONLY FUNCTION? 34%
- SOCIAL & EDUCATION 45%
- TOOLS & SPACE FOR MUSICIANS 42%
- SUPPORT FOR ARTISTS’ PROJECTS 42%
- BAR / RESTAURANT 23%
- EXHIBITION / PHOTO GALLERY 22%
- CINEMA & FILM 14%
- MULTIMEDIA & AUDIOVISUAL ART 13%
- THEATRE / DANCE 15%
- OTHER NON-MUSICAL ACTIVITIES 22%

Private non-profit music venues are independent organisations, but may receive subsidies from local, regional or national governments. The income of private non-profit venues is in average a mix of subsidy (31%) and income from the audience (55%) by ticket and catering sales, but the share of subsidy is much lower for larger (1000+) private non-profit venues, than for smaller venues. The share of expenditure spent on the music programme, workers and accommodation is not much different overview from private commercial and public venues.

There is a very high amount of volunteers (70% of all workers) working in private non-profit venues, and volunteers work is an important (34%) share of all working hours. Still the most work (58%) is done by paid professionals. In total 40% of the workers in private non-profit venues are female.
48% of all Live DMA venues are private commercial music venues, most common in the venues’ associations in Germany, Spain and the UK, and are also present in the networks in Northern Europe in Denmark, Finland, Norway and Sweden. The private commercial venues in the Live DMA network have a median of 300 audience capacity. The average private commercial venue programs 211 music events per year, with 473 artist performances, which attract well over 37,000 people per year. 32% of the private commercial music venues also organise festivals. The venues do much more than live music alone, and are also involved in educational, social, artistic (to a lesser extent) and multi-disciplinary activities, and specifically private commercial venues often combine the function of music venue with a bar or restaurant.

**VENUES FUNCTIONS PER LEGAL STATUS**

- **LIVE MUSIC ONLY FUNCTION?** 30%
- **SOCIAL & EDUCATION** 31%
- **TOOLS & SPACE FOR MUSICIANS** 21%
- **SUPPORT FOR ARTISTS’ PROJECTS** 13%
- **BAR / RESTAURANT** 48%
- **EXHIBITION / PHOTO GALLERY** 21%
- **CINEMA & FILM** 25%
- **MULTIMEDIA & AUDIOVISUAL ART** 15%
- **THEATRE / DANCE** 33%
- **OTHER NON-MUSICAL ACTIVITIES** 49%

Private commercial music venues are for-profit, but most of these venues don’t make any profit and invest all income back in the function of music venue. Since the private commercial venues mostly don’t receive subsidies (2% of total income) they rely on audience spendings (88%) on tickets and food and beverages. Although the income is very different, for private commercial venues the share of expenditure spent on the music programme, workers and accommodation is not much different from non-profit venues.

Based on collected data (years 2016 and 2017) of 193 private commercial music venues part of Live DMA.
**ACCES** represents **110 music venues** in **Spain**, excluding the regions of Catalonia and the Basque Country, which are represented by Live DMA members ASACC and Kultura Live. ACCES music venues have a median of **265** audience capacity, so are generally small. Together the venues present around **18,000** artist performances per year, which attract well over **2.8 million** visits. Also **65%** of the music venues organise festivals.

The venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

**DIVERSITY OF FUNCTIONS**

- **SOCIAL & EDUCATION FUNCTIONS**: 47%
- **TOOLS & SPACE FOR MUSICIANS**: 27%
- **SUPPORT FOR ARTISTS' PROJECT**: 20%
- **BAR / RESTAURANT OUTSIDE CONCERT HOURS**: 63%
- **EXHIBITION OR PHOTO GALLERY**: 37%
- **CINEMA & FILM**: 40%
- **MULTIMEDIA & AUDIOVISUAL ART**: 23%
- **THEATRE / DANCE**: 50%
- **OTHER ACTIVITIES**: 67%

**LEGAL STATUS**

<table>
<thead>
<tr>
<th>PUBLIC</th>
<th>PRIVATE NON-PROFIT</th>
<th>PRIVATE COMMERCIAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>0%</td>
<td>10%</td>
<td>90%</td>
</tr>
</tbody>
</table>

**ACCES** music venues are for **90%** private commercial venues, with a total income of well over **28 million** euro. Subsidy is only **2%** of the total income of all venues. The venues generate most income from the audience (93%). This money is mostly spent to cover the costs of the music programme, workers and accommodation:

**Share of Paid and Volunteers Work(ers)**

- **% PAID EMPLOYEES**: 93%
- **% VOLUNTEERS**: 2%
- **% OTHER WORKERS**: 5%

The share of volunteers is very low in Spanish music venues (2% of the total workforce). Of the **1,600** total workers in ACCES venues, **1,500** are paid workers. In total **41%** of the workers are female.

To learn more about these venues visit [salasdeconciertos.com](http://salasdeconciertos.com) and/or contact ACCES Survey coordinator Elda Gómez: elda.gomez@salasdeconciertos.com

Based on the data (year 2017) of 31 ACCES music venues, collected during 2018, and extrapolated to data of 110 music venues part of ACCES and Live DMA in 2017.
ASACC represents 69 music venues in Catalonia. They have a median of 150 audience capacity, so are generally small. Together the venues present well over 30,000 artist performances per year, which attract almost 4 million visits. Also 45% of the music venues organise festivals.

The Catalonian venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

**DIVERSITY OF FUNCTIONS**
- SOCIAL & EDUCATION FUNCTIONS: 52%
- TOOLS & SPACE FOR MUSICIANS: 35%
- SUPPORT FOR ARTISTS’ PROJECT: 26%
- BAR / RESTAURANT OUTSIDE CONCERT HOURS: 61%
- EXHIBITION OR PHOTO GALLERY: 23%
- CINEMA & FILM: 26%
- MULTIMEDIA & AUDIOVISUAL ART: 32%
- THEATRE / DANCE: 42%
- OTHER ACTIVITIES: 61%

**LEGAL STATUS**
- PUBLIC NON PROFIT: 0%
- PRIVATE NON-PROFIT: 10%
- PRIVATE COMMERCIAL: 90%

ASACC music venues are for 90% private commercial venues, with a total income of well over 67 million euro. Subsidy is only 3% of the total income of all venues. The venues generate most income from the audience (91%). This money is mostly spend to cover the costs of the music programme, workers and accommodation.

**INCOME**
- CATERING SALES: 50%
- TICKET SALES: 41%
- SUBSIDY: 3%
- OTHER INCOME: 7%

**EXPENDITURE**
- HOUSING COSTS: 14%
- WORKERS COSTS: 32%
- PROGRAMME COSTS: 23%
- OTHER EXPENSES: 30%

**Share of Paid and Volunteers Work(ers)**
- % PAID EMPLOYEES: 94%
- % VOLUNTEERS: 1%
- % OTHER WORKERS: 5%
- WORKING HOURS (FTE): 92%

The share of volunteers is very low in Catalonian music venues (1% of the total workforce). Of the 1,400 total workers in ASACC venues, 1,350 are paid workers.

To learn more about these venues visit [http://www.infoconcerts.cat/es/asacc](http://www.infoconcerts.cat/es/asacc) and/or contact ASACC Survey coordinator Adriana Alcover, adriana@asacc.net

Based on the data (year 2017) of 31 ASACC music venues, collected during 2018, and extrapolated to data of 69 music venues part of ASACC and Live DMA in 2017.
**Kultura Live** represents **15 music venues** in Basque Country. The venues have a median of **648** audience capacity, but some of them hold less than **150** people. Together the venues present **2,300 artist performances** per year, which attract well over **400,000 visits**. Also **50%** of the music venues organise festivals.

The Basque venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

**DIVERSITY OF FUNCTIONS**

- **SOCIAL & EDUCATION FUNCTIONS**: 67%
- **TOOLS & SPACE FOR MUSICIANS**: 17%
- **SUPPORT FOR ARTISTS’ PROJECT**: 33%
- **BAR / RESTAURANT OUTSIDE CONCERT HOURS**: 83%
- **EXHIBITION OR PHOTO GALLERY**: 67%
- **CINEMA & FILM**: 50%
- **MULTIMEDIA & AUDIOVISUAL ART**: 33%
- **THEATRE / DANCE**: 67%
- **OTHER ACTIVITIES**: 67%

**LEGAL STATUS**

To learn more about these venues visit [http://kulturalive.com/](http://kulturalive.com/) and/or contact Kultura Live Survey coordinator Arkaitz Villar info@kulturalive.com

Based on the data (year 2017) of 6 Kultura Live music venues, collected during 2018/2019, and extrapolated to data of 15 music venues part of Kultura Live and Live DMA in 2017.
FEDELIMA represents 142 music venues in France. The venues have a median of 500 audience capacity. Together the venues present more than 17,300 artist performances per year, which attract over 2.3 million visits. Also 48% of the music venues organise festivals.

The French venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

**DIVERSITY OF FUNCTIONS**

- **SOCIAL & EDUCATION FUNCTIONS**: 94%
- **TOOLS & SPACE FOR MUSICIANS**: 91%
- **SUPPORT FOR ARTISTS’ PROJECT**: 98%
- **BAR / RESTAURANT OUTSIDE CONCERT HOURS**: 14%
- **EXHIBITION OR PHOTO GALLERY**: 42%

In France, because of a different legislation, volunteers cannot receive any compensation or take a task or a job that can be done by an employee. Therefore they are not counted as workers and expressed in working hours and FTE in our Survey results. The French volunteers however, are included in the total human resources in the Survey, to show their high involvement in the FEDELIMA venues. In total the venues have over 8,600 human resources, of which 1,600 paid workers and well over 6,500 volunteers. In total 37% of the workers are female.

Much more information and data per type of venue can be found in the latest FEDELIMA Survey report on their website: [www.fedelima.org/article170.html](http://www.fedelima.org/article170.html) and/or contact FEDELIMA Survey coordinator Hyacinthe Chataigné, hyacinthe.chataigne@fedelima.org for more information.

Based on the data (year 2017) of 106 FEDELIMA music venues, collected during 2018, and extrapolated to data of 142 music venues part of FEDELIMA and Live DMA in 2017.
**PETZI** represents **113 music venues** in Switzerland. The venues have a median of **300 audience capacity** so are generally small. Together the venues present well over **16,400 artist performances** per year, which attract almost **2.2 million visits**. Also **57%** of the music venues organise festivals.

The Swiss venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

**DIVERSITY OF FUNCTIONS**

- **SOCIAL & EDUCATION FUNCTIONS** 28%
- **TOOLS & SPACE FOR MUSICIANS** 26%
- **SUPPORT FOR ARTISTS’ PROJECT** 29%
- **BAR / RESTAURANT OUTSIDE CONCERT HOURS** 31%

</tbody>
</table>

**PETZI** music venues are for **100%** non-profit venues, of which **94%** private and **6%** public. They generate a total income of **85 million euro**. The income is a mix of subsidy (25%) and audience spendings (64%) on tickets, food and beverages. Support from the government and the high amount of volunteers work keeps the exploitation costs lower. Therefore all money that is generated by ticket sales can be spent on direct programme costs and invested in presenting local and emerging talents.

In Switzerland volunteers are very important for the daily practices in the venue, especially for smaller and private non-profit venues. Of the 8,800 total workers in PETZI venues, over 5,500 are volunteers, responsible for 55% of all working hours.

**Based on the data (year 2016) of 80 PETZI music venues, collected during 2017, and extrapolated to data of 113 music venues part of PETZI and Live DMA in 2017.**

To learn more about these venues visit [https://www.petzi.ch/fr/](https://www.petzi.ch/fr/) and/or contact PETZI Survey coordinator Yves Merroud, yves.merroud@petzi.ch
LiveKomm represents 510 music venues in Germany, organised in different regions. Until now there is limited information available from their Survey data 2016, but this brings us already some useful information about the main characteristics and business model of the German live music venues and clubs. The LiveKomm venues have a median of 300 audience capacity so are generally small. Together the venues present well over 160,000 artist performances per year, which attract over 14.6 million visits.

LiveKomm members are a mix of private commercial venues (59%), private non-profit (30%) and public venues (11%). Therefore they have different business models, but also the non-profit venues have comparing to other European regions a low share of subsidy (6%) and venues rely mostly on ticket and catering sales to the audience (76%). Venues have in average less money to cover artistic costs than the income generated by ticket sales.

At the moment LiveKomm is cooperating with the German funding and export office for musicians and music companies Initiative Musik in a nationwide Survey project in Germany, including the collection of data of LiveKomm music venues, of which the results are expected in the fall of 2020.

The Berlin Clubcommission, representing 251 clubs, venues & promoters in Berlin, released a report with facts & figures in spring 2019, measuring the social and economical impact of the Berlin clubs, which can be downloaded right here: https://www.clubcommission.de/club-culture-study.

To learn more about LiveKomm venues visit https://www.livekomm.org/ and/or contact LiveKomm Survey coor- dinator Christian Ordon, christian.ordon@liveKomm.org

Based on the data (year 2016) of 46 LiveKomm music venues, collected during 2017 and 2018, and extrapolated to data of the 510 music venues part of LiveKomm and Live DMA in 2017.
Court-Circuit represents 36 music venues in the French speaking part of Belgium, Wallonia and Brussels. The venues have a median of 400 audience capacity. Together the venues present almost 7,000 artist performances per year, which attract over 550,000 visits. Also 89% of the music venues organise festivals.

The Court-Circuit venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

DIVERSITY OF FUNCTIONS

- **SOCIAL & EDUCATION FUNCTIONS**: 44%
- **TOOLS & SPACE FOR MUSICIANS**: 67%

Court-Circuit music venues are for 100% private non-profit venues. They generate a total income of 13.5 million euro. The income is a mix of subsidy (32%) and audience spendings (58%) on tickets, food and beverages. Support from the government and the high amount of volunteers work make housing and workers costs lower, so more money is spent on direct programme costs than is generated by ticket sales, and more can be invested in presenting local and emerging talents.

**Share of Paid and Volunteers Work(ers)**

In Belgium volunteers are very important for the daily practices in the venue, especially for smaller venues. Of the 1,200 total workers in Court-Circuit venues, almost 800 are volunteers, responsible for 39% of all working hours. In total 21% of the workers are female.

Based on the data (year 2017) of 9 Court-Circuit music venues, collected during 2018, and extrapolated to data of 36 music venues part of Court-Circuit and Live DMA in 2017.
Clubcircuit represents 15 music venues in Flanders, the Dutch speaking part of Belgium. The venues have a median of 600 audience capacity. Together the venues present almost 3,000 artist performances per year, which attract almost 550,000 visits. Also 85% of the music venues organise festivals.

The Clubcircuit venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

- SOCIAL & EDUCATION FUNCTIONS: 62%
- TOOLS & SPACE FOR MUSICIANS: 46%
- SUPPORT FOR ARTISTS’ PROJECT: 77%
- BAR / RESTAURANT OUTSIDE CONCERT HOURS: 77%
- EXHIBITION OR PHOTO GALLERY: 31%
- CINEMA & FILM: 8%
- MULTIMEDIA & AUDIOVISUAL ART: 8%
- THEATRE / DANCE: 0%
- OTHER ACTIVITIES: 92%

Clubcircuit music venues are for 100% private non-profit venues. They generate a total income of 21 million euro. The income is a mix of subsidy (40%) and audience spendings (48%) on tickets, food and beverages. Support from the government and the high amount of volunteers work make housing and workers costs lower, so more money is spent on direct programme costs than is generated by ticket sales, and more can be invested in presenting local and emerging talents.

**LEGAL STATUS**

- % OTHER WORKERS: 1%

In Belgium volunteers are very important for the daily practices in the venue, especially for smaller venues. Of the 4,200 total workers in Clubcircuit venues, over 4,000 are volunteers, responsible for 36% of all working hours. In total 29% of the workers are female.

To learn more about these venues visit www.clubcircuit.be and/or contact Clubcircuit Survey coordinator Marc Steens, info@clubcircuit.be

---

*Based on the data (year 2017) of 13 Clubcircuit music venues, collected during 2018, and extrapolated to data of 15 music venues part of Clubcircuit and Live DMA in 2017.*
The Dutch Association of Music Venues and Festivals, VNPF represents 58 music venues in the Netherlands. The venues have a median of 600 audience capacity. Together the venues present well over 26,000 artist performances per year, which attract over 4.1 million visits. Also 49% of the music venues organise festivals. The VNPF venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

**DIVERSITY OF FUNCTIONS**

- SOCIAL & EDUCATION FUNCTIONS: 16%
- TOOLS & SPACE FOR MUSICIANS: 24%
- SUPPORT FOR ARTISTS’ PROJECT: 20%
- BAR / RESTAURANT OUTSIDE CONCERT HOURS: 16%
- EXHIBITION OR PHOTO GALLERY: 14%
- CINEMA & FILM: 10%
- MULTIMEDIA & AUDIOVISUAL ART: 6%
- THEATRE / DANCE: 14%
- OTHER ACTIVITIES: 16%

VNPF music venues are for 98% private non-profit venues, They generate a total income of 167 million euro. The income is a mix of subsidy (25%) and audience spendings (62%) on tickets, food and beverages. Support from the government and the high amount of volunteers work make housing and workers costs lower, so most money that is generated by ticket sales is spent on direct programme costs, and more can be invested in presenting local and emerging talents.

In the Netherlands volunteers are very important for the daily practices in the venue, especially for smaller venues. Of the 8,200 total workers in the VNPF venues, over 4,600 are volunteers, responsible for 17% of all working hours. In total 43% of the workers are female.

To learn more about these venues visit www.vnpf.nl and/or contact VNPF Survey coordinator Arne Dee, arne@vnpf.nl

</tbody>
</table>

In Denmark volunteers are very important for the daily practices in the venue, especially for smaller venues. Of the 5,100 total workers in the Dansk Live venues, over 4,000 are volunteers, responsible for **30%** of all working hours. In total **49%** of the workers are female.

To learn more about these venues visit [http://dansklive.dk](http://dansklive.dk) and/or contact Dansk Live Survey coordinator Michael Folmer Wessman, [michael@dansklive.dk](mailto:michael@dansklive.dk)

*Based on the data (year 2017) of 43 Dansk Live music venues, collected during 2018 and 2019, and extrapolated to data of 76 music venues part of Dansk Live and Live DMA in 2017.*
The Norske Konserthusarrangører, NKA represents 165 music venues in Norway. The venues have a median of 350 audience capacity, so are generally small. Together the venues present well over 19,000 artist performances per year, which attract almost 2.8 million visits. Also 5% of the music venues organise festivals.

The Norwegian venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

- SOCIAL & EDUCATION FUNCTIONS
- TOOLS & SPACE FOR MUSICIANS
- SUPPORT FOR ARTISTS’ PROJECT
- BAR / RESTAURANT OUTSIDE CONCERT HOURS
- EXHIBITION OR PHOTO GALLERY
- CINEMA & FILM
- MULTIMEDIA & AUDIOVISUAL ART
- THEATRE / DANCE
- OTHER ACTIVITIES

NKA music venues are a mix of 21% public venues, 47% private non-profit venues, and 32% public venues and therefore have different business models. The current Survey response and results don’t give enough information yet, to publish more detailed numbers about their workers, income and expenses, but we can see that for many Norwegian venues the support from the government and the high amount of volunteers work keeps the exploitation costs lower, and this way more money can be invested in presenting local and emerging talents.

To learn more about these venues visit www.konsertarrangor.no and/or contact NKA Survey coordinator Andreas Feen Sørensen, andreas@konsertarrangor.no

Based on the data (year 2017) of 66 NKA music venues, collected during 2018 and 2019, and extrapolated to data of 165 music venues part of NKA and Live DMA in 2017.
Svensk Live represents 150 music venues in Sweden. The venues have a median of 600 audience capacity. Together the venues present well over 11,000 artist performances per year, which attract almost 1.5 million visits. Also 70% of the music venues organise festivals.

The Svensk Live venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as:

- SOCIAL & EDUCATION FUNCTIONS
- TOOLS & SPACE FOR MUSICIANS
- SUPPORT FOR ARTISTS’ PROJECT
- BAR / RESTAURANT OUTSIDE CONCERT HOURS
- EXHIBITION OR PHOTO GALLERY
- CINEMA & FILM
- MULTIMEDIA & AUDIOVISUAL ART
- THEATRE / DANCE
- OTHER ACTIVITIES

Svensk Live music venues are a mix of 70% private non-profit venues, and 30% private commercial venues. Music venues with different legal status have different business models, but looking at all Svensk Live venues the Survey results show a mixed income of subsidy (13%) and audience spendings (79%) on tickets, food and beverages. In total, the Svensk Live venues generate an income of well over 18 million euro. The money is mostly spent to cover the costs of the music programme, workers and accommodations. Comparing to other European regions in Sweden the financial support from the government for non-profit venues is relatively low.

In Sweden volunteers are very important for the daily practices in the venue, especially for smaller venues. Of the 1,300 total workers in the Svensk Live venues, over 1,050 are volunteers, responsible for 70% of all working hours. In total 55% of the workers are female.

To learn more about these venues visit www.svensklive.se and/or contact Svensk Live Survey coordinator Måns Katsler, mans@svensklive.se

Based on the data (year 2017) of 23 Svensk Live music venues, collected during 2018 and 2019, and extrapolated to data of 150 music venues part of Svensk Live and Live DMA in 2017.
**LiveFIN** represents **24 music venues** in Finland. Together the venues present well over **16,000 artist performances** per year, which attract over **2.3 million visits**. Also **40%** of the music venues organise festivals.
The LiveFIN venues do much more than live music alone, and are also involved in educational, social, artistic, culinary, and multi-disciplinary activities, such as **...**
